## PREFACE

This report is part of Volume IV of the 1971 Census of Canada and presents final results of the Census of Agriculture as of June 1, 1971.

The Introduction includes definitions of terms used in Census of Agriculture reports, and contains a section on the Agriculture Quality Check. The tabular material contains historical tables of comparable data for previous censuses, and a series of tables that provide current data for counties or census divisions and subdivisions. A number of tables report data cross-classified by such factors as size, tenure, economic class, part-time work and type of farm.

A copy of the questionnaire used in the 1971 Census of Agriculture and an Index to the tables are found in the Appendices.

Material for this report was prepared in the Agriculture Sub-Division of the Census Branch.

## PRÉFACE

Le présent rapport fait partie du volume IV du recensement du Canada de 1971. Il présente les résultats définitifs du recensement de l'agriculture, le 1er juin 1971.

L'introduction comprend les définitions des termes employés dans les rapports du recensement de l'agriculture, et une section sur le contrôle qualitatif du recensement de l'agriculture. La matière tabulaire contient des tableaux chronologiques de données comparatives des recensements antérieurs, et une série de tableaux contenant les données actuelles pour les comtés et les divisions et subdivisions de recensement. Un certain nombre de tableaux présentent des chiffres recoupés par des facteurs tels que la taille, le mode d'occupation, la catégorie économique, le travail à temps partiel et le genre de ferme.

Les appendices reproduisent un exemplaire du questionnaire employé au recensement de l'agriculture de 1971. On y trouve aussi un index des tableaux.

La matière du présent rapport a été établie à la Sous-division de l'agriculture de la Direction du recensement.

## INTRODUCTION

Volume IV of the Census of Canada presents data for the Census of Agriculture in Parts 1, 2 and 3 and for the Agriculture-Population Linkage programme in Parts 4 and 5.

For both the Census of Agriculture and the Agriculture-Population Linkage programme, computers played a major role in the processing and assimilation of data. In the Agriculture-Population Linkage programme, computers made possible, for the first time, the linkage of data for farm operators recorded on Census of Agriculture questionnaires with that of corresponding Census of Population questionnaires.

Part 1 of Volume IV comprises the summary of Census of Agriculture data for Canada and reports for the provinces of Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick. Part 2 includes the reports for the provinces of Quebec and Ontario. Part 3 contains the reports for the four Western Provinces of Manitoba, Saskatchewan, Alberta and British Columbia. Results of the Agriculture-Population Linkage programme are contained in Part 4 – Agriculture: Socio-economic Characteristics of Farm Operators and Part 5 – Agriculture: Farm Operator's Families, Households and Dwelling Facilities.

A detailed account of Census of Agriculture methodology will be found in the Administrative Report, Volume VI of the 1971 Census of Canada.

**Year to which census figures apply.** – The 1971 Census of Agriculture was taken as of June 1, 1971. Statistics for agricultural holdings – operators, areas, capital values, livestock and poultry numbers, machinery and equipment, mortgages or agreements for sale, number of year round paid agricultural workers and type of organization relate to June 1, 1971. Crop areas sown or fertilized refer to the land sown or fertilized on June 1, 1971 or to be sown or fertilized for harvest in 1971. The number of maple tappings refers to the number of tappings of maple trees during the spring of 1971.

The number of cows and heifers milked and pounds of milk produced yesterday refers to the full 24-hour period on the day before the questionnaire was to be completed.

Area of new breaking, forage seed harvested, spraying and dusting, area irrigated, weeks of hired agricultural labour, selected expenditures, value of agricultural products sold, wood products and off-farm work all refer to the year 1970. This time period is used because such operations would not have been completed for 1971.

Livestock and poultry contracts plus length of residence refer to the 12 months prior to June 1, 1971.

### Explanation of terms

An understanding of the terms which are explained below will permit a more meaningful use of the statistics provided by the Census of Agriculture. Particularly an understanding of the term "census-farm" is desired.

**Census-farm.** – This term is defined in the 1971 Census as a farm, ranch or other agricultural holding of one acre or more with sales of agricultural products, during the 12-month period prior to the census, of \$50 or more.

The holding may consist of a single tract of land or a number of separate tracts held under the same or different tenures and operated as a single unit. Where the census-farm was made up of several parts located in different municipalities, the 1971 Census reported the complete holding as one unit in the municipality where the headquarters was located.

Le volume IV du recensement du Canada présente des données provenant du recensement de l'agriculture dans les parties 1, 2 et 3 et du programme de couplage agriculture-population dans les parties 4 et 5.

Pour le recensement de l'agriculture comme pour le programme de couplage agriculture-population, l'ordinateur a joué un rôle important dans le dépouillement et l'assimilation des données. Dans le cas du programme de couplage agriculture-population, l'ordinateur a rendu possible, pour la première fois, le rapprochement entre les données sur les exploitants agricoles figurant sur les questionnaires du recensement de l'agriculture et celles des questionnaires correspondants du recensement de la population.

La partie 1 du volume IV renferme les résultats sommaires du recensement de l'agriculture pour le Canada et des bulletins distincts pour Terre-Neuve, l'Île-du-Prince-Édouard, la Nouvelle-Écosse et le Nouveau-Brunswick. La partie 2 comprend des bulletins pour le Québec et l'Ontario, et la partie 3 pour les quatre provinces de l'Ouest: Manitoba, Saskatchewan, Alberta et Colombie-Britannique. Les résultats du programme de couplage agriculture-population figurent dans la partie 4 – Agriculture: Caractéristiques socio-économiques des exploitants agricoles et dans la partie 5 – Agriculture: Familles, ménages et logements des exploitants agricoles.

Un compte rendu détaillé de la méthodologie du recensement de l'agriculture figurera dans le Rapport administratif, le volume VI du recensement du Canada, 1971.

**Année à laquelle se rapportent les résultats du recensement.** – Le recensement de l'agriculture de 1971 a été effectué relativement au 1<sup>er</sup> juin 1971. La statistique des exploitations agricoles – exploitants, superficies, valeurs en capital, bétail et volaille, machines et outillage, hypothèques ou conventions de vente, nombre de travailleurs agricoles rémunérés toute l'année et forme juridique – se rapporte au 1<sup>er</sup> juin 1971. Les superficies de culture ensemencées ou fertilisées concernent la terre ensemencée ou fertilisée le 1<sup>er</sup> juin 1971 ou à ensemencer ou fertiliser pour la récolte de 1971. Le nombre d'entailles d'érables se rapporte au nombre d'entailles d'érables au printemps de 1971.

Le nombre de vaches et de génisses traitées et de livres de lait obtenues hier se rapporte à la période complète de 24 heures précédant le jour où le questionnaire devait être rempli.

La superficie de nouveaux labours, les semences fourragères récoltées, la pulvérisation et le poudrage, la superficie irriguée, le nombre de semaines de travail agricole payé, certaines dépenses, la valeur des produits agricoles vendus, les produits forestiers et le travail hors exploitation, tous ces éléments se rapportent à l'année 1970. On utilise cette période parce que ces opérations n'auraient pas été terminées pour 1971.

Les contrats d'élevage de bétail et de volaille ainsi que la durée de résidence portent sur les 12 mois antérieurs au 1<sup>er</sup> juin 1971.

### Explication des termes

La compréhension des termes qui sont expliqués ci-après permettra une utilisation plus valable de la statistique fournie par le recensement de l'agriculture. Il faut bien comprendre en particulier l'expression "ferme de recensement".

**Ferme de recensement.** – Cette expression est définie dans le recensement de 1971 comme étant une ferme, un ranch ou une autre exploitation agricole d'une acre ou plus dont les ventes de produits agricoles au cours des douze mois précédant la date du recensement se sont élevées à \$50 ou plus.

La ferme peut se composer d'une seule ou de plusieurs parcelles de terre qui ne sont pas nécessairement détenues selon le même mode d'occupation et qui sont exploitées comme unité distincte. Lorsqu'elle était composée de plusieurs sections situées dans différentes municipalités, le recensement de 1971 inscrivait l'exploitation totale comme une seule unité dans la municipalité où se trouvait le siège de l'exploitation.

**Operator.** — This term is used in the Census of Agriculture to designate the person who is directly responsible for the agricultural operation of the holding, whether as owner, tenant or hired manager. As only one operator is listed for each census-farm, the number of operators is the same as the number of census-farms. If, for example, the holding was operated as a partnership, only one partner was considered to be the operator.

**Tenure of land.** — Agricultural holdings are classified by tenure depending on whether the operator owns, rents or leases from others or both. Area owned includes land that the operator or his wife holds under title, homestead law, purchase contract, or as a heir or trustee of any individual estate and land more or less permanently occupied by a squatter. Areas rented or leased from others include land rented or leased from others on a cash basis, rented on a share crop basis from others, areas used rent-free, and areas used under lease arrangement with federal, provincial or municipal governments. Note that land used under a per head grazing fee is not included.

In the 1971 Census, a hired manager was asked to report whether the land operated by him was owned or rented by his employer. This was a change from previous censuses wherein a farm operated by a hired manager was classified as being managed rather than owned or rented.

**Farm population.** — All persons living in a dwelling situated on a census-farm (as defined in the census) were considered to be farm population, regardless of their occupation. In the case of institutions located on a census-farm, only the manager, hired agricultural workers and members of their households were included with this population. The population figures given in Tables 2, 13 and 31 include both urban and rural census-farm population. Persons living on census-farms that were located in cities, towns and villages were included with the census-farm population of the adjoining rural subdivision.

**Census-farm areas.** — The area of census-farms reported for each subdivision represents the area of land operated by farmers whose headquarters are in the subdivision. The area of census-farms reported in Table 50 for the census subdivisions may, therefore, be greater or less than the actual agricultural area within the subdivision boundaries. For larger areal units of the provinces, that is, the census divisions, the discrepancy between reported area of census-farms and actual agricultural area will be less significant.

Crown lands, usually pasture land, which were operated under a lease arrangement with federal, provincial or municipal governments, are reported as part of the farming operation of the person to whom the land was leased. However, land which was used under a per head grazing permit or fee is not included.

Large areas of timber land or other non-agricultural land held by a census-farm operator, but operated apart from the farm business, are excluded.

**Use of land.** — All census-farm land is classified according to use under two major divisions: improved land and unimproved land.

**Improved land.** — The area of improved land consists of the total of the areas reported for the following four land categories: crop land, improved pasture, summer fallow and other improved land.

**(1) Crop land.** — Included in this item is the total area of crop land sown or to be sown for harvest in 1971. Acreages from which sod was being sold are also included in this item rather than in other improved land as in 1966. Crop land includes the total

**Exploitant.** — Ce terme est utilisé dans le recensement de l'agriculture pour désigner la personne qui est directement responsable de la bonne marche de l'exploitation agricole, qu'elle en soit propriétaire, locataire ou gérant. Comme on n'inscrit qu'un exploitant par ferme de recensement, le nombre d'exploitants est le même que le nombre de fermes de recensement. Si, par exemple, la ferme est exploitée par des associés, un seul associé est considéré comme étant exploitant.

**Mode d'occupation.** — Les exploitations agricoles sont classées selon qu'elles appartiennent à l'exploitant ou qu'elles sont prises en location ou les deux. La superficie possédée comprend les terres que l'exploitant ou son épouse détient en vertu d'un titre de propriété, d'une loi sur les exploitations agricoles, d'un contrat d'achat ou à titre d'héritier ou de fiduciaire d'une succession, et les terres occupées de façon plus ou moins permanente par un squatter. La superficie prise en location comprend les terres prises en location moyennant paiement en espèces, les superficies exploitées à la part (en métayage), celles pour lesquelles il n'est pas payé de loyer et celles appartenant à une administration fédérale, provinciale ou municipale. Il est à noter que les terres utilisées en vertu d'un permis ou d'un droit de pacage par tête de bétail ne sont pas comprises.

Au recensement de 1971, on demandait au gérant d'indiquer si la terre qu'il exploitait appartenait à son employeur ou était louée par ce dernier. Aux recensements précédents, les fermes de recensement exploitées par un gérant étaient classées comme gérées et non comme possédées ou prises en location.

**Population agricole.** — Toutes les personnes vivant dans un logement situé dans une ferme de recensement (selon la définition du recensement) sont considérées comme population agricole, quelle que soit leur profession. Dans le cas d'institutions situées dans une ferme de recensement, seuls le gérant, les travailleurs agricoles engagés et les membres de leur ménage sont compris dans la population agricole. Les chiffres de population qui figurent dans les tableaux 2, 13 et 31 englobent les populations agricoles urbaines et rurales. Les personnes vivant dans une ferme de recensement située dans une cité, une ville ou un village font partie de la population agricole de la subdivision rurale voisine.

**Superficie des fermes de recensement.** — La superficie des fermes de recensement déclarée pour chaque subdivision représente la superficie des terres exploitées par les exploitants agricoles dont le siège est situé dans la subdivision. La superficie des fermes de recensement qui figure au tableau 50 pour les subdivisions de recensement peut donc être supérieure ou inférieure à la superficie agricole réelle à l'intérieur des limites des subdivisions. Pour ce qui est des unités de superficie plus grandes des provinces, c'est-à-dire des divisions de recensement, l'écart entre la superficie déclarée des fermes de recensement et la superficie agricole réelle sera moins importante.

Les terres de la Couronne, habituellement des pâturages, qui étaient exploitées suivant un accord avec l'administration fédérale, provinciale ou municipale, sont déclarées comme faisant partie de l'exploitation agricole de la personne à qui la terre a été louée. Toutefois, les terres utilisées en vertu d'un permis ou d'un droit de pacage par tête de bétail ne sont pas prises en compte.

Les grandes terres à bois ou autres terres non agricoles appartenant à un exploitant de ferme de recensement, mais non exploitées comme entreprises agricoles, ne sont pas comptées.

**Utilisation de la terre.** — Toutes les terres des fermes de recensement sont classées suivant leur utilisation dans deux catégories principales: terre défrichée et terre non défrichée.

**Terre défrichée.** — La superficie de terre défrichée est la somme des superficies déclarées appartenant aux quatre catégories suivantes: terre en culture, pâturage défriché, jachères et autre terre défrichée.

**1) Terre en culture.** — Cette rubrique comprend la superficie totale des terres en culture enssemencées ou à enssemencer pour la récolte de 1971. Les superficies utilisées pour fournir du placage d'engazonnement destiné à la vente sont également comprises dans

area of all field crops, Table 34, plus the areas of fruits, Table 37, vegetables, greenhouses, mushroom houses and nursery products, Table 36. Because some crops are reported in fractions of an acre, there may be slight differences between the sum of the individual crop acreages and the total crop land. Where intercropping or double cropping is practised, the land area was to be reported only once in the category "area under crops" but the areas of each crop are included with the individual crop acreages.

**(2) Improved pasture.** — All land which was being used for pasture or grazing and which has had some improvements made to it in recent years is included. Improvements would include cultivation, drainage, irrigation, fertilization, seeding down or spraying.

**(3) Summer fallow.** — The enumerator was instructed to include in this item land from which no crop was to be harvested during 1971, but which was to be cultivated or worked during the year for weed control and/or for moisture conservation. Areas which were sown to a crop with the intention of ploughing the crop under as green manure were enumerated as summer fallow, but land ploughed or cultivated in the summer after a crop (such as hay or fall rye) had been harvested, was to be enumerated as crop land.

**(4) Other improved land.** — This item includes the area of barnyards, home gardens, lanes and roads on census-farms. It also includes areas of cultivated land that were lying idle, being neither summer-fallowed nor cropped, and areas of new breaking that had not been seeded to a crop.

**Unimproved land.** — The area of unimproved land consists of the total areas reported for (1) Woodland and (2) Other unimproved land.

**(1) Woodland.** — This includes census-farm woodlots, land leased for cutting, sugar bush and cut-over land with young growth which has or will have value as timber, fuelwood or Christmas trees. The area of trees planted for wind-breaks was also to be included. It excludes large timber tracts which are run as a separate business from the census-farm. There is some evidence that changes in the area of this item between censuses may be due to differences in interpretation. This would be particularly true in areas of bushland.

**(2) Other unimproved land.** — Areas of native pasture or hay land that had not been cultivated, brush pasture, grazing or waste land, sloughs, marsh and rocky land, etc. are all included in this item.

**Unimproved pasture.** — The area of unimproved land that was used for pasture during 1971 was reported as unimproved pasture. Areas of community pastures on which census-farm operators had cattle being pastured were not included on the farm of the operators themselves, but were enumerated as part of the community pasture. Such areas would be included in the total area of unimproved pasture for the subdivision in which the headquarters of the community pasture was located.

**New breaking.** — The area of virgin land that was first ploughed in 1970 was reported as new breaking. Areas of land that were once broken but have been idle for a number of years and then rebroken in 1970 were not to be included.

**Crops.** — The area of crops in 1971 represents the areas planted or to be planted for harvest in 1971, as reported by the respondent at the time of enumeration.

Actual harvested acreages may vary from the census report due to changes in planting intentions or crop failure which

cette rubrique, plutôt que dans "autre terre défrichée" comme en 1966. La terre en culture comprend la superficie totale de toutes les grandes cultures (tableau 34), plus les superficies des fruits (tableau 37), et les légumes, serres, champignonnières et produits de pépinière (tableau 36). Du fait que certaines cultures sont déclarées en fractions d'acre, il pourra y avoir de légères différences entre la somme des superficies cultivées et la superficie totale des terres en culture. Là où se pratiquent des cultures successives ou entreplantées, la superficie de la terre ne devait être prise en compte qu'une fois dans la catégorie "superficie en culture", mais la superficie de chaque culture est comprise dans les différentes superficies cultivées.

**2) Pâturage défriché.** — Toute terre utilisée comme pâturage ou pacage et améliorée de quelque façon ces dernières années est comptée. Les améliorations peuvent comprendre: mise en culture, drainage, irrigation, fertilisation, ensemencement ou pulvérisation.

**3) Jachères.** — L'agent recenseur avait pour instructions de prendre en compte dans cette rubrique les terres qui n'allaient pas produire de récolte en 1971, mais qui seraient cultivées ou labourées durant l'année pour empêcher la croissance des mauvaises herbes et (ou) conserver l'humidité. Les superficies qui étaient ensemencées dans l'intention d'enfouir des cultures pour constituer de l'engrais vert ont été comptées comme jachères, mais les terres labourées ou cultivées en été après la récolte d'une culture (de foin ou de seigle d'automne, par exemple) devaient être comptées comme terres en culture.

**4) Autre terre défrichée.** — Cette rubrique comprend la superficie des basses-cours, jardins potagers, chemins et routes dans les fermes de recensement. Elle comprend également les superficies de terre cultivée qui sont demeurées incultes, n'ayant pas été mises en jachère ni en culture, et les superficies de nouveaux labours qui n'avaient pas été ensemencées en vue d'une récolte.

**Terre non défrichée.** — La superficie de terre non défrichée représente les superficies totales de 1) terre à bois et boisés de ferme, et de 2) autre terre non défrichée.

**1) Terre à bois et boisés de ferme.** — Ceci comprend les terres à bois et les boisés de ferme de recensement, les terres louées pour la coupe du bois, les érablières et les terrains déboisés où se trouvent des jeunes pousses ou des arbres qui ont ou auront de la valeur comme sciages, bois de chauffage ou arbres de Noël. La superficie des brise-vent devait également être prise en compte. Ne comprend pas les grandes sections de coupe du bois exploitées indépendamment de la ferme de recensement. Il se peut que les variations de superficie à cette rubrique d'un recensement à l'autre proviennent des différences d'interprétation, notamment pour ce qui est des superficies de buissons.

**2) Autre terre non défrichée.** — Les superficies de pâturages naturels ou les terres à foin non cultivées, les pâturages en broussailles, les terres incultes ou de pacage, les marécages, les marais et les terres rocailleuses, etc. sont toutes prises en compte dans cette rubrique.

**Pâturages non défrichés.** — La superficie des terres non défrichées qui ont servi de pâturage en 1971 a été déclarée comme pâturages non défrichés. Les pâturages communautaires où des bovins étaient gardés en pacage n'ont pas été comptés avec la ferme des exploitants eux-mêmes, mais plutôt avec le pâturage communautaire. Ces superficies sont comprises dans la superficie totale des pâturages non défrichés pour la subdivision où le siège du pâturage communautaire est situé.

**Nouveaux labours.** — La superficie de terre neuve labourée pour la première fois en 1970 a été déclarée comme nouveaux labours. Les superficies déjà labourées, mais demeurées incultes pendant un certain nombre d'années, puis labourées de nouveau en 1970 ne devaient pas être comptées.

**Cultures.** — La superficie des cultures en 1971 représente les superficies ensemencées ou à ensemercer pour la récolte de 1971, telles que déclarées par le recensé au moment du recensement.

L'étendue réelle des superficies récoltées peut être différente de la déclaration du recensement à cause des changements dans la superficie

occurred after the date of enumeration. In the case of hay land, where two or more cuttings of hay are taken, the acreage was to be reported only once. In the 1971 Census, unlike previous censuses, only the acreage of potatoes mainly for sale was recorded. This contributed to a decrease in potato acreage for those areas in which potatoes for home use are commonly grown. Acreages from which sod is being sold are included with "other field crops".

Tree fruits were reported only when there were 25 fruit trees or more on the holding. Fruit trees which were definitely abandoned and worthless were not to be included when reporting the number of trees.

The area of vegetables and small cultivated fruits was to be reported only when these products were being grown mainly for sale. For the 1971 Census of Agriculture, turnips were recorded under vegetables rather than under field crops as in past censuses. The area on which vegetable seed was to be produced during 1971 was to be reported under the item "other vegetables".

The area of mushroom houses was recorded separately from that of greenhouses for the first time in 1971. Both areas were recorded in square feet. Greenhouses which were used only for the initial growth of plants, which were later transplanted to the field are not included. Nursery products, cut flowers and dry bulbs were to be reported only when grown mainly for sale.

**Fertilized crops.** — The area of crops sown for harvest in 1971 for which commercial fertilizer had been or was to be applied was reported. Fertilizer applied in the fall of 1970 on crops to be harvested in 1971 was included.

**Forage seed harvested.** — The area of crops from which forage seed was actually harvested in 1970 was reported.

**Spraying and dusting.** — The area to which chemical sprays or dust were applied in 1970 to the land or crops for control of (a) insects and disease and (b) weeds and brush was reported.

**Irrigation.** — Irrigation was defined as the application of water to land by artificial means, through a system of ditches, furrows, sprinklers or similar works. The purchase of custom irrigation was also to be reported. Irrigation systems used exclusively for home gardens were not to be reported.

Data on irrigation were enumerated for all provinces in 1970 as compared to only Ontario, Saskatchewan, Alberta and British Columbia for 1960.

Some farms reporting an irrigation system in 1971 did not irrigate in 1970 because irrigation was not required that year, or the irrigation system was first acquired in 1971. This accounts for the difference in Tables 29, 48 and 60 between the two sets of figures for farms reporting an irrigation system in 1971 and farms reporting land irrigated in 1970.

**Livestock and poultry.** — Livestock and poultry were reported on the census-farms where they were located, regardless of ownership, except for livestock kept on community pastures. In this case, livestock are related to the holding of the operator owning them rather than to the community pasture.

When reporting the number of cows and heifers kept mainly for milking purposes, the enumerators were instructed to include "cows and heifers", 2 years and over, milking or to be milked and "heifers", 1 year and under 2 years, being raised mainly for milk production regardless of whether or not they were of dairy breeding.

de culture projetée ou de récoltes manquées qui se sont produits après la date du recensement. Dans le cas des terres à foin qui donnaient deux ou plusieurs récoltes, la superficie ne devait être déclarée qu'une seule fois. Au recensement de 1971, contrairement aux recensements précédents, seule la superficie de pommes de terre cultivées surtout pour la vente était déclarée, ce qui a contribué à réduire la superficie de pommes de terre pour ces étendues où on la cultive généralement pour la consommation dans la ferme. Les superficies dont on vend du placage d'engazonnement sont comprises dans "autres grandes cultures".

Les fruits de verger étaient déclarés seulement quand il y avait au moins 25 arbres fruitiers dans l'exploitation. Les arbres fruitiers abandonnés ou sans valeur ne devaient pas être inclus dans le nombre des arbres.

La superficie de légumes et de petits fruits cultivés devait être déclarée seulement quand ces produits étaient cultivés surtout pour la vente. Au recensement de l'agriculture de 1971, le navet était considéré comme légume et non plus comme grande culture comme c'était le cas dans les recensements antérieurs. Les superficies où l'on devait produire des semences de légumes en 1971 devaient être prises en compte à la rubrique "autres légumes".

La superficie des champignonnières a été déclarée séparément de celle des serres pour la première fois en 1971. Les deux superficies étaient évaluées en pieds carrés. Les serres qui servaient uniquement à faire pousser des jeunes plants qui seraient transplantés plus tard à l'extérieur ne sont pas comptées. Les produits de pépinière, les fleurs à couper et les bulbes secs ne devaient être comptés que lorsqu'ils étaient cultivés surtout pour la vente.

**Cultures fertilisées.** — La superficie de cultures à récolter en 1971 sur laquelle on a épandu ou devait épandre des engrais commerciaux a été déclarée. Les cultures à récolter en 1971 sur lesquelles on avait épandu de l'engrais à l'automne de 1970 ont été comptées.

**Semences fourragères récoltées.** — La superficie de cultures qui a effectivement fourni des semences fourragères en 1970 a été déclarée.

**Pulvérisation et poudrage.** — La superficie où l'on a appliqué en 1970 des produits chimiques de pulvérisation ou de poudrage sur le sol ou sur les cultures a) contre les insectes et les maladies et b) contre les mauvaises herbes et les broussailles a été déclarée.

**Irrigation.** — L'irrigation a été définie comme l'application d'eau sur une terre par des moyens artificiels tels qu'un réseau de fossés, de rigoles, des appareils d'arrosage ou d'autres ouvrages semblables. L'achat de services d'irrigation devait également être compris, mais non les systèmes qui servent exclusivement à arroser les jardins potagers.

Les données sur l'irrigation ont été recensées pour toutes les provinces en 1970, alors qu'en 1960, elles ne l'avaient été que pour l'Ontario, la Saskatchewan, l'Alberta et la Colombie-Britannique.

Certaines fermes qui ont déclaré avoir un système d'irrigation en 1971 n'ont pas irrigué en 1970 parce qu'elles n'avaient pas eu besoin de le faire cette année-là ou parce qu'elles avaient acquis leur système en 1971. Ceci explique l'écart, aux tableaux 29, 48 et 60, entre les deux ensembles de chiffres pour les fermes déclarant un système d'irrigation en 1971 et celles déclarant des superficies irriguées en 1970.

**Bétail et volaille.** — Le bétail et la volaille ont été pris en compte dans la ferme de recensement où ils se trouvaient, quel qu'en fût le propriétaire, à l'exception du bétail élevé dans un pâturage communautaire. Dans ce cas, le bétail a été rattaché à l'exploitation de son propriétaire plutôt qu'au pâturage communautaire.

Pour ce qui est du nombre de vaches et de génisses élevées principalement pour la production laitière, l'agent recenseur avait pour instruction de compter les "vaches et génisses", de deux ans et plus, en lactation ou devant être traitées, et les "génisses", de 1 an et de moins de 2 ans, élevées principalement pour la production laitière qu'elles appartiennent ou non à une race laitière.

**Milk produced yesterday.** — The number of cows and heifers milked and the pounds of milk produced were asked for the day before the questionnaire was completed, generally May 31, 1971 and relate to the production and cows milked for the full 24-hour period. It has been found that a recent 24-hour period is more readily recalled than a longer period.

**Livestock and poultry contracts.** — These represent contracts between operators who fed livestock and/or poultry and feed dealers, processors, hatcheries, retailers or co-operatives. They include only written contracts which specify the terms and responsibilities of each party.

The farm operators were asked whether there existed a mortgage or agreement for sale indebtedness on their farm buildings or the land they owned or the land and buildings owned by the employer of the manager of managed land. The class of the creditor holding the mortgage or agreement for sale was asked.

**Capital values.** — This is the value of census-farm capital: land and buildings, machinery and equipment (including automobiles), livestock and poultry. Census-farm operators were asked to give a value for land and buildings, farm machinery and equipment on their holding regardless of tenure. The value reported was to be an estimate of the market value, not the original, replacement or assessed value.

The value of land and buildings was to be the value of the property when used for agricultural purposes. For areas surrounding cities or towns, the real estate value for non-agricultural purposes of the census-farm property was not to be reported.

The value to be reported for farm machinery was the present market value — that is, the amount for which the machinery and equipment would sell if there was a willing buyer and a willing seller, and not a forced sale. It might be explained as the price the machine would likely bring, in its present condition at an auction sale. The original or replacement value was not to be reported unless it conformed with the market value.

The total value of machinery and equipment includes the value of items not reported separately as well as the value of the machines which were reported separately. The value of irrigation equipment on the holding is included in the total value.

Values for the livestock and poultry reported in the census were compiled from data on average farm values for various types of livestock and poultry obtained by the Agriculture Division of Statistics Canada.

In some cases, capital values do not add because of rounding.

**Machinery and equipment.** — The number and value was to be reported for agricultural machines on the holding at the census date, regardless of whether the machines were owned by the operator or someone else. Old machines no longer being used were not to be reported. Equipment owned in partnership was to be reported on the census-farm where it was located.

**Hired agricultural labour.** — Total weeks of paid agricultural labour (15 years and over) hired during 1970 were recorded. Male and female labour was recorded separately. The number of paid agricultural workers employed on a year round basis as of June 1, 1971 was also enumerated. (Housework was not included as agricultural labour.) Any person doing agricultural work on the census-farm for wages, salary, commission or on a piece-rate or labour contract basis, was reported as paid labour. This included paid managers and members of the operator's family receiving regular or specified cash wages. Total weeks of agricultural work done by members of a Hutterite Colony were included as hired

**Production de lait hier.** — On demandait le nombre de vaches et de génisses traites et le nombre de livres de lait obtenues le jour précédant celui où l'on remplissait le questionnaire, soit en général le 31 mai 1971, et ce pour une période complète de 24 heures. On a constaté qu'il est plus facile pour le recensé de fournir le renseignement pour une période récente que pour une période éloignée.

**Contrats d'élevage de bétail et de volaille.** — Ce renseignement vise les contrats entre les exploitants qui ont engraisé du bétail et (ou) des volailles et les vendeurs d'aliments pour animaux, les conditionneurs, les couvoirs, les détaillants ou les coopératives. Seuls les contrats écrits qui précisent les conditions et les engagements de chaque contractant sont pris en compte.

On demandait aux exploitants agricoles s'il existait une hypothèque ou une convention de vente pour les bâtiments de ferme ou la terre qui leur appartenaient ou, dans le cas d'un gérant, qui appartenaient à l'employeur. On demandait également de préciser le genre de détenteur de l'hypothèque ou de la convention de vente.

**Valeur en capital.** — Ceci est la valeur en capital de la ferme de recensement: terre et bâtiments, machines et outillage (y compris automobiles), bétail et volaille. Les exploitants de ferme de recensement devaient indiquer la valeur de la terre et des bâtiments, des machines et de l'outillage qui se trouvaient dans leur exploitation, quel que fût le mode d'occupation. La valeur indiquée devait être une estimation de la valeur marchande, non pas la valeur initiale, la valeur de remplacement ou la valeur imposée.

La valeur de la terre et des bâtiments devait représenter la valeur des biens utilisés à des fins agricoles. Pour ce qui est des secteurs entourant des cités ou des villes, la valeur immobilière à des fins non agricoles des fermes de recensement ne devait pas être prise en compte.

La valeur à indiquer pour les machines agricoles était la valeur marchande actuelle, c'est-à-dire le prix auquel les machines se vendraient advenant un vendeur et un acheteur libres d'effectuer la transaction. En d'autres termes, c'était le prix que la machine, dans son état actuel, rapporterait probablement à l'enchère. Ni la valeur initiale ni la valeur de remplacement ne devait être indiquée à moins qu'elle ne correspondît à la valeur marchande.

La valeur totale des machines et de l'outillage comprend la valeur des articles non déclarés séparément ainsi que celle des machines déclarées séparément. La valeur du matériel d'irrigation de l'exploitation est comprise dans la valeur totale.

Les valeurs des bestiaux et des volailles déclarées au recensement ont été tirées des données sur les valeurs moyennes à la ferme pour différents types de bestiaux et de volailles obtenues par la Division de l'agriculture de Statistique Canada.

Dans certains cas, les chiffres ayant été arrondis leur somme ne correspond pas aux totaux indiqués.

**Machines et outillage.** — Le nombre et la valeur des machines agricoles se trouvant dans l'exploitation le jour du recensement, qu'elles appartiennent ou non à l'exploitant, devaient être déclarés. Les vieilles machines qui ne servent plus ne devaient pas être comptées. L'outillage possédé en commun avec un associé devait être déclaré dans l'exploitation où il se trouvait.

**Main-d'oeuvre agricole engagée.** — Le nombre total de semaines de travail agricole payé effectué par des travailleurs âgés de 15 ans et plus en 1970 a été déclaré. La main-d'oeuvre masculine et féminine a été comptée séparément. Le nombre de travailleurs agricoles rémunérés engagés à l'année au 1<sup>er</sup> juin 1971 a également été indiqué. (Les travaux ménagers n'étaient pas considérés comme travail agricole.) Toute personne effectuant du travail agricole dans la ferme de recensement contre salaire, traitement, commission, rémunération à la pièce ou suivant un contrat de travail, a été déclarée comme main-d'oeuvre rémunérée. Celle-ci comprend les gérants engagés et les membres de la famille de l'exploitant qui reçoivent un salaire en argent, régulier ou

agricultural labour and full-time labour of the colony was included as paid year round agricultural workers.

**Forest products.** — Cords of fuelwood and pulpwood, board feet of logs and number of Christmas trees sold from census-farm woodland in 1970 were recorded. In addition, the number of tappings of maple trees for the spring of 1971 were recorded, whether on the holding or in open woods for which no rental was paid.

**Off-farm work during 1970.** — Two questions relating to all off-farm work performed during 1970 by the census-farm operator were asked. First, "How many days did you (the operator) work off this holding at paid agricultural and non-agricultural work during 1970? ". Exchange work was not to be included. The second asked for the "kind of paid off-farm work done during 1970 and number of days worked at each". For agricultural work off the holding, custom work was to be included.

**Selected expenditures.** — These expenditures, whether paid in cash or obtained on credit, were reported for each census-farm for the year 1970. Cash wages paid to hired agricultural labour did not include amount paid for housework, custom work and construction labour. Custom work was to be included with the item "machine rental, custom work, or contract work". Taxes were the amount levied on all agricultural property owned and operated by the respondent on June 1, 1971 whether paid or not. Rent was on all rented or leased agricultural property operated by the respondent on that same date. Fuel and oil used for farm purposes did not include that used in automobiles. Finally, lime was not included in commercial fertilizer purchased.

**Value of agricultural products sold.** — Respondents were instructed to report the value of all agricultural products sold during 1970 (whether received by the operator or some other person). They were to include cash advances for stored grain, deficiency payments and patronage dividends for the particular products involved. For tenant-operated farms, the landlord's share of products sold was to be included. Products of an institutional farm or Hutterite Colony used by the same were considered sold and an estimate of their value recorded in the appropriate question.

Government payments were to be reported for the particular products for which the payments were being made. A separate question was included for such income items as Wheat Reduction payments (or the LIFT programme), PFAA payments and crop insurance.

For contract operations, the total value of sales of livestock and poultry were to be included even though the ownership of the livestock or poultry was shared with a feed dealer, poultry dealer, or other person under a contract arrangement.

When no sales data were reported, such as in the case of crop failure or the census-farm being operated for the first time in 1971, an estimate of sales was usually assigned during the computer edit phase of the processing based on the reported crop and livestock inventory.

**Residence of operator.** — The length of time the operator lived on the holding during the 12-month period prior to the census was recorded as 9-12 months, 5-8 months, 1-4 months or did not live on this holding.

spécifique. Le nombre total de semaines de travail agricole exécuté par les membres d'une colonie hutterite a été compté comme semaines de travail agricole payé et les travailleurs à plein temps de la colonie ont été considérés comme travailleurs agricoles rémunérés employés toute l'année.

**Produits de la forêt.** — Les cordes de bois de chauffage et de bois à pâte, les billes en pieds-planche et le nombre d'arbres de Noël provenant de la ferme de recensement et vendus en 1970 ont été comptés. De plus, le nombre d'entaillages d'érables au printemps 1971 a été déclaré, qu'elles aient été effectuées dans l'exploitation ou dans les bois sans qu'aucun loyer n'ait été payé.

**Travail hors exploitation en 1970.** — Deux questions ont été posées relativement à tous les travaux hors exploitation accomplis en 1970 par l'exploitant de la ferme de recensement. Premièrement, "Combien de jours avez-vous (l'exploitant) travaillé en dehors de l'exploitation à des travaux agricoles ou non agricoles rémunérés en 1970?". Le travail d'échange n'a pas été retenu. La deuxième question portait sur le "genre de travail rémunéré hors exploitation en 1970 et nombre de jours consacrés à chaque travail". Le travail sur commande devait être compris dans le travail agricole en dehors de l'exploitation.

**Certaines dépenses.** — Ces dépenses, déjà payées ou à crédit, étaient déclarées à l'égard de chaque ferme de recensement pour l'année 1970. Les salaires en argent payés aux travailleurs agricoles engagés ne comprenaient pas le coût des travaux ménagers, du travail sur commande et des travaux de construction. Le coût du travail sur commande devait être pris en compte sous "location de machines, travail sur commande ou à forfait". Les taxes représentaient le montant des impôts fonciers levés sur les biens agricoles appartenant au recensé et exploités par lui au 1<sup>er</sup> juin 1971, qu'ils aient été payés ou non. Le loyer portait sur les biens agricoles donnés ou pris en location, exploités par le recensé à cette même date. Le carburant et l'huile consommés à des fins agricoles ne comprenaient pas ceux utilisés pour les automobiles. Finalement, la chaux n'était pas comprise dans les engrais commerciaux achetés.

**Valeur des produits agricoles vendus.** — On avait demandé aux recensés de déclarer la valeur de tous les produits agricoles vendus en 1970 (que le produit des ventes ait été reçu par l'exploitant ou par une autre personne). Ils devaient prendre en compte les avances en espèces pour les céréales entreposées, les paiements d'appoint et les ristournes pour les produits particuliers en cause. Pour ce qui est des fermes exploitées par un locataire, la part des recettes des ventes revenant au propriétaire devait être incluse. Dans le cas d'une ferme d'institution ou d'une colonie hutterite, les produits consommés par l'institution étaient considérés comme vendus et on en indiquait la valeur approximative à la question appropriée.

Les paiements du gouvernement devaient être déclarés à l'égard des produits particuliers pour lesquels ils étaient effectués. Il y avait une question distincte pour les postes de revenu tels que les paiements pour réduction d'emblavures, le programme de réduction des stocks de blé (LIFT), les paiements en vertu de la Loi sur l'assistance à l'agriculture des Prairies et ceux de l'assurance-récoltes.

Lorsqu'il existait un contrat, la valeur totale des ventes de bestiaux et de volailles devait être comptée, même si les bestiaux et les volailles appartenaient en commun au vendeur d'aliments pour animaux, au marchand de volailles, ou à une autre personne en vertu du contrat.

Quand n'apparaissait aucune donnée sur les ventes, par exemple dans le cas de récoltes manquées ou de fermes de recensement exploitées pour la première fois en 1971, une estimation des ventes était habituellement faite lors de la vérification par ordinateur, à partir du stock de cultures et de bétail.

**Résidence de l'exploitant.** — La période durant laquelle l'exploitant avait habité dans la ferme au cours des 12 mois précédant le recensement était indiquée comme suit: 9-12 mois, 5-8 mois, 1-4 mois et ne l'ai pas habitée.

**Type of organization.** — The respondent was asked the type of agricultural holding he operated as: (1) operated privately by an individual, (2) a partnership, (3) an institution or community pasture, (4) operated as an incorporated business, (a) with the shares owned mostly by him and his family, or (b) with most of the shares owned by some other person(s) or business, or (5) other.

Included as operated privately by an individual were holdings operated by or for an individual regardless of whether owned, rented or managed. Land managed for an incorporated firm in conjunction with land operated by an owner or rented for his own use if the total operation was predominantly by the individual for himself, was included in this category also. Partnerships included only operations having a formalized written partnership agreement, e.g., written partnerships between two or more individuals, or between fathers and sons, or other family members. Oral or implied agreements that were not in written form were not included as partnerships, but were typed as being operated privately by an individual. "Institution" referred to land used for agricultural purposes by institutions such as experimental farms, schools or penitentiaries, but did not include land owned by an institution but rented to an individual who operated it on his own account. To be included as a community pasture or other type of public pasture, the land had to be owned by a municipality, province or federal government. "Incorporated family" referred to farms operated as incorporated businesses with the shares owned mostly by the operator and his family. "Incorporated other" referred to farms operated as incorporated businesses with the shares owned mostly by people other than the operator and his family.

**Economic classification of census-farms.** — The classification of census-farms into economic classes (based upon the gross income received from sales of agricultural products) presents a measure of the productive size of the holdings. With the exception of "institutional farms, etc.", all census-farms are classified as one of the twelve economic classes listed below:

|                |                     |
|----------------|---------------------|
| \$ 50 - \$ 249 | \$ 7,500 - \$ 9,999 |
| 250 - 1,199    | 10,000 - 14,999     |
| 1,200 - 2,499  | 15,000 - 24,999     |
| 2,500 - 3,749  | 25,000 - 34,999     |
| 3,750 - 4,999  | 35,000 - 49,999     |
| 5,000 - 7,499  | 50,000 and over     |

The division of census-farms into "commercial farms" and "small-scale farms" as was done in the 1961 and 1966 Censuses has been dropped in favour of additional data being provided for the economic classes listed above and/or for groupings of these classes. This change in the presentation of the statistics for the 1971 Census of Agriculture was brought about since what may be considered commercial in one region may be considered small-scale in other regions.

It should be noted that variations in annual production and prices of agricultural products affect the economic class of individual census-farms.

**The number of farms by product type.** — With the exception of "institutional farms, etc.", all census-farms in 1971 with \$2,500 or more of agricultural sales were classified as one of ten major product types. A criterion of 51.0 per cent or more of the total sales was used for the classification. For example, a farm was classed as a poultry farm if 51.0 per cent or more of the total agricultural sales of this holding were obtained from the sale of poultry products. Under this criterion, it was possible for the farm to qualify for more than one product type. To prevent this possibility, the ten product types were given a priority rating in the order they are listed below.

**Forme juridique.** — Le recensé devait indiquer la forme juridique de son exploitation agricole: 1) exploitée par une seule personne, 2) exploitée par des associés, 3) institution ou pâturage communautaire, 4) exploitée comme entreprise constituée en corporation, a) dont la plupart des actions sont détenues par lui et sa famille, ou b) dont la plupart des actions sont détenues par d'autres personnes ou une autre entreprise, ou 5) autre.

Ont été considérées comme exploitées par une seule personne les fermes exploitées par une seule personne ou pour le compte d'une seule personne, que celle-ci ait été propriétaire, locataire ou gérant. Était également comprise dans cette catégorie toute terre que l'exploitant gérait pour le compte d'une société constituée en corporation tout en exploitant une autre terre, à titre de propriétaire ou de locataire, si l'exploitation de la terre pour lui-même était l'élément prédominant. Les associations ne comprenaient que celles fondées sur une convention écrite, par exemple un document qui établissait l'association entre deux ou plusieurs individus, entre pères et fils, ou entre d'autres membres de la famille. S'il n'y avait que des conventions orales ou tacites non fondées sur un document écrit, la ferme n'était pas considérée comme exploitée par des associés mais bien comme exploitée par une seule personne. "Institution" désignait toute terre utilisée à des fins agricoles par des établissements tels que les fermes expérimentales, les écoles ou les pénitenciers, mais ne comprenait pas les terres appartenant à un établissement mais données en location à un particulier qui l'exploitait à son propre compte. Pour être considérée comme pâturage communautaire ou autre type de pâturage public, la terre devait appartenir à une municipalité, à une province ou au gouvernement fédéral. "Entreprise familiale constituée en corporation" désignait les fermes exploitées comme entreprises constituées en corporation dont la plupart des actions étaient détenues par l'exploitant et sa famille. "Autre entreprise constituée en corporation" désignait les fermes exploitées comme entreprises constituées en corporation dont la majorité des actions étaient détenues par des personnes autres que l'exploitant et les membres de sa famille.

**Classification économique des fermes de recensement.** — Les fermes de recensement sont classées en catégories économiques (fondées sur la valeur totale des ventes de produits agricoles), ce qui permet de mesurer la taille productive des exploitations. À l'exception des "fermes d'institution, etc.", toutes les fermes de recensement sont classées dans l'une des douze catégories économiques suivantes:

|                |                     |
|----------------|---------------------|
| \$ 50 - \$ 249 | \$ 7,500 - \$ 9,999 |
| 250 - 1,199    | 10,000 - 14,999     |
| 1,200 - 2,499  | 15,000 - 24,999     |

La division des fermes de recensement en "fermes commerciales" et en "petites fermes", réalisée aux recensements de 1961 et 1966, a été remplacée par des données supplémentaires sur les catégories économiques énumérées ci-haut et (ou) sur des groupements de ces catégories. La présentation de la statistique du recensement de l'agriculture de 1971 a ainsi été modifiée pour la raison qu'une ferme qui est considérée comme commerciale dans une région donnée peut être considérée comme petite dans d'autres régions.

Il est à noter que les variations de la production annuelle et du prix des produits agricoles influent sur la catégorie économique des fermes de recensement.

**Nombre de fermes selon le genre du produit.** — Toutes les fermes de recensement en 1971 (sauf les "fermes d'institution, etc.") dont les ventes de produits agricoles ont été de \$2,500 et plus sont classées suivant dix grands genres de produits. Le critère de classement est une proportion de 51.0 % ou plus des ventes totales. Par exemple, une ferme est une ferme avicole si ses ventes de produits avicoles représentent 51.0 % ou plus de l'ensemble de ses ventes de produits agricoles. Avec ce critère, il restait possible qu'une ferme soit classée suivant plus d'un genre de produits. Afin d'éliminer cette possibilité, les dix genres de produits ont été classés suivant l'ordre de priorité ci-après.

**Dairy.** — (a) 51.0 per cent or more of the total sales of agricultural products obtained from the sale of dairy products; or

(b) 40.0 to 50.9 per cent of the total sales of agricultural products obtained from dairy products, provided that the sale of dairy products together with the sales of cattle and calves amount to 51.0 per cent or more of the total sales of agricultural products sold.

**Cattle, hogs, sheep** (excluding farms qualifying as dairy). — 51.0 per cent or more of the total sales of agricultural products obtained from the sale of cattle, hogs and sheep (including wool).

**Poultry.** — 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of hens and chickens, turkeys, ducks, geese and poultry products.

**Wheat.** — (a) In the four Western Provinces (Manitoba, Saskatchewan, Alberta and British Columbia), 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of wheat (spring, durum and winter), plus 1970 Canadian Wheat Board payments and 75.0 per cent of other receipts for field crops, such as Wheat Reduction payments, PFAA payments, crop insurance, etc.

(b) In the six Eastern Provinces, 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of wheat (spring, durum and winter).

**Small grains** (excluding farms qualifying as wheat). — (a) In the four Western Provinces, 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of all grains plus 25.0 per cent of other receipts for field crops, such as Wheat Reduction payments, PFAA payments, crop insurance, etc. Grains include wheat, oats, barley, rye, mixed grains, buckwheat, corn for grain, field peas, field beans, flaxseed, soybeans, sunflowers, rapeseed, mustard seed and safflower.

(b) In the six Eastern Provinces, 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of all grains.

**Field crops, other than small grains.** — (a) In the four Western Provinces, 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of hay and fodder crops (including forage crop seed), potatoes, sugar beets, tobacco and field crops not elsewhere specified.

(b) In the six Eastern Provinces, 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of field crops other than grains plus other receipts for field crops, such as crop insurance, etc.

**Fruits and vegetables.** — 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of vegetable seeds, vegetables (excluding potatoes), tree fruits and small fruits (including berries, grapes, and other small cultivated fruits).

**Forestry.** — 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of forest products (including stumpage sales but excluding maple products).

**Miscellaneous specialty.** — (a) 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of greenhouse and nursery products, cut flowers, dry bulbs and mushrooms; or

(b) 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of horses of all ages; or

**Produits laitiers.** — a) Si les ventes de produits laitiers représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus; ou

b) si les ventes de produits laitiers représentent de 40.0 à 50.9 % de la valeur totale des produits agricoles vendus, pourvu que les ventes de produits laitiers, ajoutées à celles de gros bovins et de veaux, représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Bovins, porcs, moutons** (sans les fermes laitières). — Si les ventes de bovins, de porcs et de moutons (y compris la laine) représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Volaille.** — Si les ventes de poules et poulets, de dindons, de canards, d'oies et de produits avicoles représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Blé.** — a) Dans les quatre provinces de l'Ouest (Manitoba, Saskatchewan, Alberta et Colombie-Britannique), si les ventes de blé (de printemps, durum et d'hiver) et les paiements pour 1970 de la Commission canadienne du blé représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus et 75.0 % des autres recettes au titre des grandes cultures telles que les paiements pour réduction d'embavures, les sommes reçues en vertu de la Loi sur l'assistance à l'agriculture des Prairies, les indemnités d'assurance-récoltes, etc.

b) Dans les six provinces de l'Est, si les ventes de blé (de printemps, durum et d'hiver) représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Menus grains** (sauf les fermes à blé). — a) Dans les quatre provinces de l'Ouest, si les ventes de céréales et une proportion de 25.0 % des autres recettes au titre des grandes cultures telles que les paiements pour réduction d'embavures, les sommes reçues en vertu de la Loi sur l'assistance à l'agriculture des Prairies, les indemnités d'assurance-récoltes, etc. représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus. Les céréales comprennent le blé, l'avoine, l'orge, le seigle, les céréales mélangées, le sarrasin, le maïs (grain), les pois et les haricots des champs, la graine de lin, le soya, le tournesol, le colza, la moutarde et le carthame.

b) Dans les six provinces de l'Est, si les ventes de céréales représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Grandes cultures, autres que menus grains.** — a) Dans les quatre provinces de l'Ouest, si les ventes de foin et de cultures fourragères (y compris les semences de cultures fourragères), de pommes de terre, de betteraves sucrières, de tabac et de grandes cultures non classées ailleurs représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

b) Dans les six provinces de l'Est, si les ventes de grandes cultures (autres que les céréales) et les autres recettes au titre des grandes cultures telles que les indemnités d'assurance-récoltes, etc. représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Fruits et légumes.** — Si les ventes de légumes et semences de légumes (sans les pommes de terre), de fruits de verger et de petits fruits (y compris les baies, les raisins et les autres petits fruits cultivés) représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Produits forestiers.** — Si les ventes de produits forestiers (y compris la vente de droits de coupe, mais non la vente de produits de l'érabie) représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Spécialités diverses.** — a) Si les ventes de produits de serre et de pépinière, de fleurs coupées, de bulbes secs et de champignons représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus; ou

b) si les ventes de chevaux de tous âges représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus; ou

(c) 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of another class of agricultural products such as honey and beeswax; fur-bearing animals and pelts; maple products; and goats and goat's milk.

**Mixed farm.** — (a) Livestock combination — 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of livestock and livestock products. Items included are those included in the specialty groups of dairy; cattle, hogs, sheep; and poultry.

(b) Field crops combination — 51.0 per cent or more of the total sales of agricultural products obtained from the sale of all field crops. Items included are those included in the specialty groups of wheat, small grains, and field crops, other than small grains.

(c) Other combinations — This is a residual group and includes all farms not qualifying for one of the product types listed above.

In addition to the ten major product types outlined above, the following two supplemental product types have been identified. — (a) Cattle — 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of cattle.

(b) Hogs — 51.0 per cent or more of the total value of agricultural products sold obtained from the sale of hogs.

**Enumeration of Hutterite Colonies.** — Workers on the Hutterite farms were reported as paid workers even though they receive no wages. In tables which show weeks of paid labour and number of paid year round workers, the numbers on Hutterite Colonies are included in the totals.

Hutterite farms are included with other census-farms in the economic classification of farms and are not included with institutional-type farms.

**Enumeration of community pastures.** — Community pastures were enumerated in the municipality in which the headquarters of the pasture was located. The complete pasture was enumerated on one questionnaire.

Livestock kept on the community pasture for other farm operators were not to be reported on the questionnaire completed for the community pasture. Such livestock were reported on the census-farm of the person who owned them.

Community pastures were classed as institutional-type farms.

**Conversion of arpents to acres.** — In some sections of the province of Quebec, the land measure is the "arpent" and the respondent reported land areas in this unit. The conversion to acres was made in Statistics Canada using the factor 1,000 arpents equal 845 acres.

**Availability of data.** — To make Census of Agriculture data more accessible to the user, an Agriculture Data Directory has been prepared and is available on request. The directory identifies the data available and indicates the form(s) — whether microfilm, microfilm photocopy, or computer summary tapes, in which they may be obtained.

A limited amount of data have been tabulated for crop districts in Saskatchewan and for the British Columbia census divisions as they existed in 1966. Summaries of these are available on request.

**Limits imposed by confidentiality.** — All data released by the Census of Agriculture are subject to the confidentiality restrictions of Statistics Canada. Thus, to prevent the disclosure of confidential material, data for areas with less than ten farms will generally not be published but merged with a geographically neighbouring area. Also, certain data have been suppressed to prevent disclosure of the

c) si les ventes d'une autre catégorie de produits agricoles tels que le miel et la cire d'abeille, les animaux à fourrure et les peaux, les produits de l'érable, les chèvres et le lait de chèvre, représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Ferme diversifiée.** — a) Bétail et autres produits — Si les ventes de bétail et de produits du bétail représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus. Sont compris dans ces produits ceux des groupes spécialisés de fermes laitières; de fermes bovines, porcines et ovines; et de fermes avicoles.

b) Combinaison de grandes cultures — Si les ventes de toutes les grandes cultures représentent 51.0 % ou plus des ventes totales de produits agricoles. Sont compris dans ces produits ceux des groupes spécialisés de fermes à blé; à menus grains; et de grandes cultures autres que les menus grains.

c) Autres combinaisons — Groupe résiduel qui comprend toutes les fermes ne pouvant être classées suivant l'un ou l'autre des genres de produits susmentionnés.

En plus des dix genres de produits principaux décrits ci-haut, les deux genres de produits supplémentaires suivants ont été établis. — a) Bovins — Si les ventes de bovins représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

b) Porcs — Si les ventes de porcs représentent 51.0 % ou plus de la valeur totale des produits agricoles vendus.

**Recensement des colonies huttérîtes.** — Les travailleurs des fermes huttérîtes ont été déclarés comme travailleurs rémunérés même s'ils ne reçoivent pas de salaire. Aux tableaux qui montrent le nombre de semaines de travail payé et le nombre de travailleurs agricoles rémunérés employés toute l'année, les nombres se rapportant aux colonies huttérîtes sont compris dans les totaux.

Les fermes huttérîtes sont comprises avec les fermes de recensement dans la classification économique des fermes et non pas avec les fermes d'institution.

**Dénombrement des pâturages communautaires.** — Les pâturages communautaires ont été dénombrés dans la municipalité où le siège du pâturage était situé. Le pâturage complet a été déclaré sur un seul questionnaire.

Les bestiaux élevés dans les pâturages communautaires pour le compte d'autres exploitants agricoles ne devaient pas être déclarés sur le questionnaire du pâturage communautaire, mais plutôt sur celui de la ferme de recensement de leur propriétaire.

Les pâturages communautaires ont été classés comme fermes d'institution.

**Conversion des arpents en acres.** — Dans certaines régions du Québec, l'aire est mesurée en "arpents" et le recensé exprime l'étendue des superficies dans cette unité de mesure. La conversion en acres a été faite à Statistique Canada en utilisant le facteur suivant: 1,000 arpents égalent 845 acres.

**Disponibilité des données.** — Pour rendre les données du recensement de l'agriculture de 1971 plus accessibles à l'utilisateur, on a rédigé un Répertoire des données agricoles, disponible sur demande. Le répertoire précise les données qui sont disponibles et indique sous quelle(s) forme(s) elles le sont: microfilm, photocopie de microfilm ou bande sommaire mécanographique.

Une quantité limitée de données a été totalisée pour les districts de cultures de la Saskatchewan et les divisions de recensement de la Colombie-Britannique tels qu'ils existaient en 1966. Des sommaires de ces données sont disponibles sur demande.

**Restrictions imposées par le caractère confidentiel des données.** — Toutes les données du recensement de l'agriculture sont soumises aux restrictions qu'impose Statistique Canada pour en préserver le caractère confidentiel. Par conséquent, pour empêcher la divulgation de renseignements secrets, les données sur les régions comportant moins de dix exploitations agricoles ne seront généralement pas publiées mais seront

operations of an identifiable individual agricultural holding. In such cases, it will be found that totals for the particular tables involved do not add.

### Quality of Census Data

Idealistically, a census, such as the 1971 Census of Agriculture would have 100 per cent coverage of all census-farms with perfect answers to all relevant questions. Realistically, a census is characterized by inherent errors. These errors are due to a variety of causes, such as enumerator's errors, incomplete enumeration and misunderstanding on the part of the respondents of the data desired. In order that an appreciation of the magnitude of these census errors be available, a special probability sample survey was conducted in July 1971, one month after the Census of Agriculture.

For Agricultural Quality Check (AQC) purposes, the sample survey was designed to supply independent estimates of the number of census-farms and farm land usage. The sample was drawn from the total Canadian agricultural universe excluding Newfoundland, the Yukon and Northwest Territories and all Indian Reserves. It consisted of 70 strata representing various agricultural conditions common to the Canadian agricultural scene and included about 16,000 census-farms.

The survey itself is subject to errors similar to those affecting the census, in addition to sampling error. The reliability (sampling error) of each estimate, however, is calculated in order to establish a confidence interval within which the true value of the item (with known probability) will nearly always lie. The difference between the census total and the AQC estimate is the estimate of the net census error. For example, the AQC estimate of the agricultural land area in Canada (excluding Newfoundland, Yukon and Northwest Territories) is 173,778,000 acres with an associated sampling error of 3 per cent (or standard deviation of 5,153,000 acres). Thus, from the AQC estimate, with probability 0.95, the true acreage of farm land is in the range  $173,778,000 \pm 2(5,153,000)$  which is 163,472,000 to 184,084,000 acres. The census total of 169,601,462 acres does lie in this interval. The net discrepancy of 4,176,538 acres can be attributed to the sampling error of the estimate. Conversely, if the census total were not within the interval, the net error could not be attributed solely to the sampling error in the AQC estimate.

An examination of the estimates presented shows that the census is generally undercounted. The problems are mainly due to undercoverage leading to a systematic downward bias in the census totals, e.g. the continuing problems of underenumeration of small farms. However, most of census totals are within their 0.95 confidence intervals. The net census errors in crop land, such as tame hay and mixed grains, could be partly due to the fact that some of the crops were intended to be seeded at the census date but by the date of the AQC the actual acreages differed from those intended and, in some cases, were completely changed to different crops.

We have stated that the procedures used for the AQC were designed to reduce or eliminate sources of systematic error. This may not apply regarding the classification of farms in economic classes, since the data collection techniques for the census and AQC were different from one another. Table 3, giving the breakdown of farms into economic classes, should therefore be used with caution. The use of aggregate figures over all economic classes is, of course, free from this problem.

More information about the reliability or interpretation of the information may be obtained from the Census of Agriculture, Statistics Canada, K1A OT7.

incorporées à celles d'une région avoisinante. De même, certaines données ont été supprimées de façon à éviter la divulgation des opérations d'une exploitation agricole identifiable. Pour ces cas particuliers, vous trouverez que les totaux de certains tableaux ne correspondent pas.

### Qualité des données du recensement

Idéalement, un recensement comme le recensement de l'agriculture de 1971 doit porter sur toutes les fermes de recensement et les réponses qui sont données à toutes les questions pertinentes doivent être parfaites. Dans la réalité, toutefois, les recensements se sont toujours entachés d'erreurs inhérentes: erreurs de l'agent recenseur, dénombrement incomplet, mauvaise compréhension des questions, etc. Afin de mesurer l'importance de ces erreurs, on a fait une enquête-échantillon de probabilité spéciale en juillet 1971, un mois après le recensement de l'agriculture.

Le sondage a été conçu pour permettre d'établir des estimations indépendantes du nombre de fermes de recensement et de l'utilisation des terres agricoles aux fins du contrôle qualitatif des questionnaires agricoles (C.Q.A.). L'échantillon a été tiré de l'univers des exploitations agricoles du Canada (à l'exclusion de Terre-Neuve, du Yukon, des Territoires du Nord-Ouest et des réserves indiennes). Il était composé de 70 strates représentant les divers aspects caractéristiques de l'agriculture au Canada, et comprenait environ 16,000 fermes de recensement.

En plus de l'erreur d'échantillonnage, l'enquête est sujette aux mêmes erreurs que le recensement. On calcule donc le degré de fiabilité (erreur d'échantillonnage) de chaque estimation afin d'établir un intervalle de confiance où la vraie valeur de l'estimation (la probabilité étant connue) se situera presque toujours. La différence entre les chiffres du recensement et l'estimation C.Q.A. est la valeur estimative de l'erreur nette du recensement. Par exemple, l'estimation C.Q.A. de la superficie des terres agricoles au Canada (sans Terre-Neuve, le Yukon et les Territoires du Nord-Ouest) est de 173,778,000 acres, l'erreur d'échantillonnage étant de 3 % (ou un écart-type de 5,153,000 acres). Ainsi, à partir de l'estimation C.Q.A. (la probabilité étant de 0.95), la vraie superficie des terres agricoles se situe à  $173,778,000 \pm 2(5,153,000)$  soit 163,472,000 à 184,084,000 acres. Le nombre d'acres total au recensement (169,601,462) se situe dans cet intervalle. L'écart net de 4,176,538 acres peut être imputable à l'erreur d'échantillonnage de l'estimation. Par contre, si le total au recensement ne se situait pas dans l'intervalle, l'erreur nette ne pourrait pas être attribuée seulement à l'erreur d'échantillonnage dont est entaché le sondage C.Q.A.

Si l'on étudie les estimations présentées ici, on constate que les chiffres du recensement ont tendance à être inférieurs à la réalité. On attribue principalement ces difficultés à un manque d'universalité du dénombrement, qui cause lui-même une erreur systématique par défaut dans les résultats du recensement; on peut citer, à titre d'exemple, les difficultés constantes que soulève le sous-dénombrement des petites fermes. Cependant, la plupart des chiffres du recensement se situent dans l'intervalle de confiance de 0.95. De plus l'erreur nette du recensement en ce qui a trait aux surfaces cultivées (le foin cultivé, les céréales mélangées par exemple), peut être en partie attribuable au fait que les cultivateurs avaient l'intention d'ensemencer certaines cultures le jour du recensement, mais qu'à la date du C.Q.A., le nombre d'acres réel était différent de celui qu'ils avaient projeté et, que dans certains cas, ils avaient même complètement changé d'idée.

Nous avons précisé que les procédures utilisées pour le C.Q.A. étaient conçues de façon à réduire ou à éliminer les sources d'erreurs systématiques. Cela pourrait ne pas s'appliquer au classement des fermes par catégorie économique, car les méthodes de collecte des données pour le recensement et le C.Q.A. ne sont pas les mêmes. On devra donc utiliser avec circonspection les chiffres du tableau 3 qui donne la ventilation des fermes par catégorie économique. Bien sûr, le problème n'existe plus en ce qui concerne les chiffres globaux pour l'ensemble des catégories économiques.

On peut obtenir plus de détails sur la fiabilité ou l'interprétation de ces renseignements en s'adressant au recensement de l'agriculture, Statistique Canada, K1A OT7.

TABLE 21. Value of Agricultural Products Sold from Census-farms, 1970, by Economic Class

TABLEAU 21. Valeur des produits agricoles vendus dans les fermes de recensement, 1970, par catégorie économique

**Note:** The figures reported in this table were collected primarily for purposes of farm classification but are being published because of their usefulness for studies at the county or census division level. They differ from the cash income figures published by the Agriculture Division, Statistics Canada, and the user should exercise caution when using them. See "Introduction".

**Nota:** Les chiffres de ce tableau ont été réunis surtout pour les besoins du classement des fermes mais ils sont publiés en raison de leur utilité dans les études à l'échelon du comté ou de la division de recensement. Ils diffèrent de ceux du revenu monétaire publiés par la Division de l'agriculture, Statistique Canada, et l'utilisateur ne devra les utiliser qu'avec réserve. Voir "Introduction".

TABLE 40. Value of Agricultural Products Sold from Census-farms, 1970, by Census Division

Note: The figures reported in this table were collected primarily for purposes of farm classification but are being published because of their usefulness for studies at the county or census division level. They differ from the cash income figures published by the Agriculture Division, Statistics Canada, and the user should exercise caution when using them. See "Introduction".

An X indicates that figures are withheld to avoid disclosing individual operations but these are included in the total.

TABLEAU 40. Valeur des produits agricoles vendus dans les fermes de recensement, 1970, par division de recensement

Nota: Les chiffres de ce tableau ont été réunis surtout pour les besoins du classement des fermes mais ils sont publiés en raison de leur utilité dans les études à l'échelon du comté ou de la division de recensement. Ils diffèrent de ceux du revenu monétaire publiés par la Division de l'agriculture, Statistique Canada, et l'usager ne devra les utiliser qu'avec réserve. Voir "Introduction".

Un X indique que les chiffres sont retenus afin de ne pas divulguer les opérations particulières, mais ils sont compris dans les totaux.

## INSTRUCTIONS

## Please note:

- Complete this questionnaire if you operate a farm, ranch or other agricultural holding of — one acre or more with — sales of agricultural products during the past 12 months of \$50 or more.
- Agricultural products include any of the following:
  - livestock and poultry
  - animal products
  - field crops
  - vegetables, fruits or berries for sale
  - greenhouse and nursery products
  - fur-bearing animals
- Income from the rental of pasture is also considered as agricultural income.
- The operator is the person responsible for the day-to-day decisions made in the operation of the holding.

## Remember:

- Please complete this questionnaire on June 1, 1971. Then keep it for the Census Representative. Do not mail.
- Answer all questions that apply to your holding. Mark the "No" and "None" boxes, where they apply, with an "X".
- Use your records, if you can. Otherwise, enter the best estimate possible.
- Use the black pencil supplied and enter answers as clearly as possible.
- Do not report fractions of acres except where space has been provided to report fractions in tenths of acres. Example:  $2\frac{5}{10}$  acres of tobacco.
- In some areas of the Province of Quebec the land is surveyed in arpents. If your holding is in these areas, mark "Arpents" at the top of the questionnaire and answer the area questions in arpents.

## It's Confidential

The information you provide is strictly confidential — by law. The Statistics Act, a law passed by Parliament, authorizes the Dominion Bureau of Statistics to collect this information. It also guarantees confidentiality. All DBS employees are sworn to secrecy and heavy penalties await anyone who breaks that oath. Information collected is for statistical purposes only, and your personal return will be released to no one — not even to another government department.

## DIRECTIVES

## Important:

- Remplissez ce questionnaire si vous exploitez une ferme, un ranch ou une autre exploitation agricole
  - qui a une superficie d'une acre ou plus, et
  - dont les ventes de produits agricoles se sont élevées à \$50 ou plus au cours des douze derniers mois.
- La production agricole comprend l'un ou l'autre des produits suivants:
  - bétail et volaille
  - produits d'origine animale
  - grandes cultures
  - légumes, fruits ou baies pour la vente
  - produits de serre et de pépinière
  - animaux à fourrure
- Le revenu provenant de la location de pâturages est aussi considéré comme un revenu agricole.
- L'exploitant est la personne qui prend au jour le jour les décisions nécessaires à la bonne marche de l'exploitation.

## N'oubliez pas:

- Remplissez le questionnaire le 1<sup>er</sup> juin 1971 et conservez-le jusqu'au retour du représentant du recensement. Ne l'envoyez pas par la poste.
- Répondez à toutes les questions qui se rapportent à votre exploitation. Mettez un "X" dans les cases "Non" et "Aucun(e)", quand il y a lieu.
- Si possible, consultez vos dossiers; autrement, donnez une estimation aussi précise que possible.
- Servez-vous du crayon noir qu'on vous a fourni et faites toutes vos inscriptions aussi clairement que possible.
- N'indiquez pas les fractions d'acre, sauf quand on le demande; dans ce cas, donnez-les en dixièmes. Exemple:  $2\frac{5}{10}$  acres de tabac.
- Dans certaines régions du Québec, la superficie des terres est exprimée en arpents. Si votre exploitation se trouve dans une de ces régions, écrivez "Arpents" au haut du questionnaire et donnez vos réponses en arpents.

## Déclaration confidentielle

Les renseignements que vous nous fournissez sont strictement confidentiels, aux termes mêmes de la loi. La Loi sur la statistique autorise le Bureau fédéral de la statistique à recueillir ces renseignements. Elle en assure par ailleurs le caractère confidentiel. Tous les employés du B.F.S. sont tenus au secret sous serment, et des sanctions sévères sont prévues à l'endroit de quiconque viole son serment. Les renseignements recueillis servent à des fins statistiques seulement, et votre questionnaire ne sera communiqué à personne, pas même à un autre ministère de l'Etat.

## Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

### Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

### How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

### Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

### Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

### Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

## Publications du recensement du Canada de 1971

Le présent bulletin fait partie de la série des volumes des recensements de la population, du logement et de l'agriculture de 1971. Cette série compte au total environ 225 bulletins présentés de telle sorte qu'en retirant leur couverture l'utilisateur peut les réunir et constituer ainsi les 6 volumes de la série, qui comprennent 25 parties distinctes. Un auto-relieur à couverture rigide portant le titre approprié est compris dans le prix d'achat de la série complète des bulletins constituant une partie de volume.

### Catalogue

On peut se procurer un catalogue qui décrit chaque bulletin de la série des volumes du recensement de 1971, ainsi que les bulletins des autres séries (série préliminaire, série des secteurs de recensement et série spéciale). Le catalogue contient également une liste de prix et une formule de commande. On peut obtenir un exemplaire de ce catalogue en s'adressant à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6. Pour tout renseignement complémentaire sur les publications du recensement, s'adresser à la Division de l'information de Statistique Canada.

### Commandes de bulletins

Les commandes de bulletins peuvent être envoyées à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6, ou à la Division de l'édition, Information Canada, Ottawa K1A 0S9. Toute commande doit être accompagnée d'un chèque ou d'un mandat établi à l'ordre du Receveur général du Canada. On peut aussi commander les publications du recensement aux librairies d'Information Canada de Halifax, de Montréal, d'Ottawa, de Toronto, de Winnipeg et de Vancouver. Pour plus de détails sur les comptes de dépôt, les commandes en gros, etc., s'adresser à la Distribution des publications, Statistique Canada.

### Autres formes de publication

En plus des diverses publications contenant les résultats du recensement de 1971, de nombreux tableaux seront mis à la disposition des utilisateurs sous forme d'états mécanographiés. Ces tableaux seront également disponibles en microcopie. Les utilisateurs désireux de faire des analyses par des moyens mécanographiques pourront également se procurer un large éventail de tableaux statistiques sur bandes "sommaries". Pour tout renseignement sur le contenu, le prix et la disponibilité des résultats du recensement sur ces supports, s'adresser au Service-utilisateurs, Division du recensement, Statistique Canada, Ottawa K1A 0T7.

### Totalisations spéciales

Dans la mesure où le respect du secret des données le permettra, Statistique Canada établira, à l'intention des utilisateurs qui en acquitteront les frais, des totalisations spéciales qui ne font pas encore partie du programme d'exploitation prévu. On peut obtenir auprès du Service-utilisateurs de la Division du recensement de Statistique Canada une formule normalisée sur laquelle l'utilisateur précisera ses besoins et demandera une estimation du délai et du prix.

### Cartes et fichiers géographiques

Les utilisateurs pourront se procurer des cartes à grande échelle indiquant les limites des secteurs de dénombrement (c.-à-d. des territoires recensés par chaque représentant du recensement) ainsi que des cartes à petite échelle des divisions de recensement et des autres secteurs statistiques. Les documents constituant les fichiers géographiques (noms, codes, etc. géographiques) sont disponibles sous forme de tableaux présentant les différents secteurs de dénombrement qui constituent les unités administratives et statistiques (par ex., villes, villages, municipalités et secteurs de recensement). Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs de la Division du recensement de Statistique Canada.
